

A Picture Book of Numbers

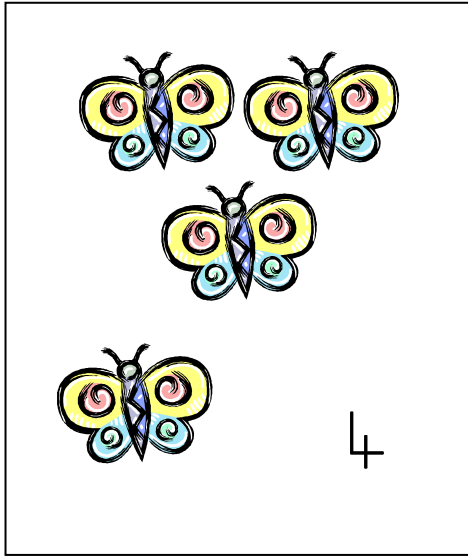

Where are they now?

Matches collections, number names and symbols for some numbers in the range 1 to 10

Where to next?

Students make, name, record numbers to 10

Why?

This activity provides an opportunity for students to consolidate their knowledge of the meaning of numerals as well as gaining practice in forming numerals.

Materials:

- Poster paper, textas, pencils etc.

How?

Assign one or two numbers (in the range to 10) to individuals or pairs of students. Students record their number as a numeral on a sheet of paper, then draw the correct number of objects to match their numeral on poster paper.

The students then join up with other students to sequence their number posters to make a number picture book for the class.
