

Race to One Hundred

Number of Students: Small Groups

Materials:

- 1 1-6 Spinner or Dice per group
- 1 Tens or Ones Spinner per group
- 1 paperclip per group
- 1 Race to One Hundred Chart per group
- 1 unique coloured counter per person

Preparation:

Sufficient spinners and charts need to be photocopied / printed.

Spinner sheets need to be cut (two spinners per page)

Both spinner sheets and charts can be laminated for longevity, although this is not strictly necessary.

How :

Each student starts the game with their counter in the zero square. They then first spin the 1 – 6 spinner to get a number, then the ones / tens spinner to find out if this number gives how many ones or how many tens. They then move their counter the indicated number of spaces forwards. The first student to reach 100 or more wins. An exact spin is not needed at the end.

Students should be encouraged to count on (from their last number) out loud by tens or ones as they move their marker.
